

## safari (za'fa:ri) سفر Reise - A MULTIPLAYER EXPLORATION

At the Institute for experimental Architecture, University Innsbruck, Valerie Messini and Damjan Minovski of studio3 pursue the teaching mission of imparting an abstract approach and way of thinking to architecture students in order to reinterpret space. Various projects have been created in cooperation with the young architects so far, but SAFARI is one of their absolute favorite projects. In the spirit of empathy for the unknown and breaking up the habit that is already so hated and prevents progress, they created a shared heterogeneous world, positive negative, fluctuating, immaterial and virtual. In our video we show a small excerpt of the creative concepts. The recordings work best in large format and with a very loud sound through the headphones. In this constellation, the sequence offers a brief digression into the future.
